To Whom It May Concern,

Yesterday morning at  
Goonhavern Primary School an interesting object  
was discovered on the field. We were very lucky  
we weren't at school on the weekend otherwise  
one of us would have got hurt because it  
looks like it has come from space at a terrific  
speed. There is a huge hole in the ground and  
it looks slightly burnt. It looks like it has  
come from an angle. On the side it has the  
letters, esa. We researched these letters and it stands  
for 'European Space Agency'. It also has a planet  
logo that symbolises space. For your information  
it was mainly white and silver with holes in it.  
Please would you come and help us identify the  
object and help us see safe again?
